This map is for information purposes only. It is a DRAFT screening map showing the location of potential unevaluated wetlands that may be regulated if they meet certain criteria. The criteria are: presence of organic soils, and the presence of water based plants (considered wetland species plants), and must be connected to a watercourse or waterbody. Wetlands will be assessed on a case by case basis to determine if they meet the criteria. Prior to any alternation or work in or around unevaluated wetlands that meet the criteria, MVCA must be contacted.

This map is produced in part with data provided by the Ontario Geographic Data Exchange under Licence with the Ontario Ministry of Natural Resources and the Queen's Printer for Ontario, 2017
